

elementalLONDON strengthens industry impact through ongoing partnership with ADE: Heat Networks

elementalLONDON has confirmed the continuation of its partnership with ADE: Heat Networks for 2026, reinforcing its commitment to tackling one of the built environment's most urgent challenges: the decarbonisation of heat.

As the UK accelerates towards net zero, heat networks are playing an increasingly critical role in delivering low carbon, efficient energy systems. Through this ongoing partnership, elementalLONDON will work closely with ADE: Heat Networks to bring this agenda to the forefront of the event, connecting policy, innovation and practical delivery.

Building on a successful 2025 collaboration, ADE: Heat Networks will once again play a key role within elementalLONDON, contributing to the live conference programme, sharing industry insight and engaging directly with specifiers, engineers, developers and decision-makers across the built environment.

Nic Losardo, Event Director of elementalLONDON, said:

"We are really pleased to be continuing our partnership with ADE: Heat Networks for 2026. Heat networks are a key part of the conversation around building performance and net-zero, and working together allows us to bring the right people, ideas and solutions into one place. It's about making sure our audience can connect with the organisations driving real progress in this space."

Chris Unsworth, Head of ADE: Heat Networks commented:

"Working together with elementalLONDON is extremely important at this time. There are big changes underway with the building sector linked to the Future Homes and Building Standard as well as more sector specific change for the heat networks sector. Ensuring the right conversations are had about the right solutions for specific buildings, developments and regions is vital to ensure that we can bring everyone along in the journey towards decarbonisation. We're really looking forward to jumping in and moving the conversation forward."

Industry support for elementalLONDON and London Build continues to grow, with over **650 exhibitors, 900 speakers and 25,000 visitors** expected in 2026.

25-26 November 26
Excel London

Leading organisations already confirmed include: Beijer Ref, Mitsubishi Electric, Mitsubishi Heavy Industries, Danfoss, Dethermina, Rinnai, Panasonic, NIBE, Baxi Commercial, Siemens, Celsius Hire, Fujitsu, Resideo, Schwank, Belimo, Polypipe, Wavin, Vectaire, Qvantum, Stelrad and more...

The event will feature a comprehensive content programme across 17 CPD-accredited stages, covering commercial and industrial HVAC, social housing, retrofit, district heating, MMC, digital construction and fire safety, with heat networks and low carbon energy embedded throughout.

Positioned at the intersection of construction, building services and sustainability, elementaLLONDON provides a unique platform for advancing the efficiency of buildings.
